Objective

Full Stack Java Developer with strong skills in Core Java, Advanced Java, React.js, HTML, CSS, Bootstrap, JavaScript, Oracle SQL and PL/SQL. Skilled in Object-Oriented Programming, building responsive web interfaces, and developing database-driven applications. Looking to contribute to a growth-oriented team as a fresher while gaining real-world experience.

Technical Skills

Languages	Core Java (OOP, Collections, Exception Handling, Java 8 Features, Multithreading, File Handling), Advanced Java (JDBC, Servlets, JSP), JavaScript (ES6+).
Frontend	HTML5, CSS3, Bootstrap 5, Responsive Design, Flexbox, CSS Grid.
Framework	React.js (Components, JSX, Props, State, Hooks, React Router, API Integration).
Database	Oracle SQL, Advanced SQL (Joins, Subqueries, Aggregations, Indexes), PL/SQL.
Tools & VCS	Git, GitHub, VS Code, SQL Plus.

Projects

Employee Management System | [Source Code](#)

Jun 2026

Technologies: Core Java, JDBC, Oracle SQL

Java Developer – Academic Project

- Developed a console-based Employee Management System using Core Java and JDBC connectivity.
- Implemented CRUD operations to add, update, search, and delete employee records stored in Oracle SQL.
- Applied Object-Oriented Programming concepts including classes, objects, encapsulation, and abstraction.
- Handled database connectivity, exception handling, and modular code design for better maintainability.

Personal Portfolio Website | [Preview](#)

May 2026

Technologies: HTML5, CSS3, Bootstrap 5, JavaScript

Frontend Developer – Personal Project

- Designed and developed a responsive portfolio website to showcase projects, technical skills, and professional information.
- Built modern user interfaces using HTML5, CSS3, Bootstrap 5, Flexbox, and CSS Grid.
- Implemented JavaScript-based interactive features including navigation controls and dynamic UI behavior.
- Optimized the website layout for different screen sizes following responsive design principles.

Employee Payroll System | [Source Code](#)

Apr – May 2026

Technologies: Oracle SQL, PL/SQL

Database Developer – Academic Project

- Designed and developed a payroll database system using Oracle SQL and PL/SQL concepts.
- Created a normalized database schema with employee, department, attendance, salary, and payroll tables.
- Developed stored procedures, functions, triggers, and SQL queries for payroll processing and reporting.
- Applied database concepts including constraints, joins, subqueries, and normalization for data consistency.

Education

Bachelor of Computer Applications (BCA)

Chikiti Mahavidyalaya, Berhampur University

Aug 2022 – May 2025

Brahmapur, Odisha

Full Stack Java Developer Training

Naresh IT

Mar 2026 – Ongoing

Hyderabad, Telangana

Certifications & Achievements

- Naresh IT – Full Stack Java Developer Certification
- HackerRank – SQL (Basic & Intermediate) Certified [link](#)
- Consistent problem-solving practice on HackerRank and LeetCode

Additional Information

Strengths: Problem-solving, attention to detail, quick learner, team collaboration, deadline-driven.

Interests: Full Stack Development, React.js Development, Database Optimization, UI/UX Design, Open-Source Contribution.

Languages: English, Hindi, Odia
